The information contained in this document is proprietary and confidential to Oracle and is subject to the non-disclosure obligations described in the license agreement between your company and Oracle. You may not provide this document or any copy of this document to third parties outside your company unless you first obtain the written permission of Oracle.

This document introduces new and changed business and technical features that Oracle has included in the ”Single Fix” described in this document.

The functionality of the Single Fix described in this document may be superseded by functionality included in a future Single Fix, Release or Update. Oracle reserves the right to revise or expand the functionality of any future Single Fix, Release or Update of SMDF in a manner compatible with Oracle’s business objectives, and the business objectives of each of Oracle’s customers, at the time that Oracle makes the software code generally commercially available.

Oracle will provide you with additional information concerning product Releases or Updates after Oracle finalizes the related specifications and tests the product component(s). Final documentation will be shipped to you with the media containing the Release or Update.

Please contact Oracle Customer Service Group if you have any questions or comments concerning this document, which has been prepared for your benefit as a licensee of SMDF.

1. Reported Issue

Description

When updating standalone Field Activities (no parent) the Update Orchestrator created is not linked to Field Activity. Update orchestrator is created but not shown when viewing the originating activity.

Steps To Recreate

1. Initiate FA/D1-ReadMeter for current date and SP ID 12345 (address = LL11)
2. FA initiated, FA O/B communication is created and moved to Awaiting Response.
3. On FA page click on Initiate Update.
4. Fill out required fields and save.
5. Update Orchestration activity is created.
6. Navigate back to Field Activity.
7. Issue: no Update Orchestration activity listed in Hierarchy tree.
8. The user must search for Update Orchestration activity.

Investigation

Problem Cause

The current system has a limitation where it only populates Orchestration activities related to "Request Orchestrator activities". The defect requires enhancing the system components to also populate in the activity tree, cancel, or update Orchestration activities related to "Field Activity".

Suggested Solution

The fix is to provide functionality to populate. Cancel\Update Orchestration activities related to Field Activity.

Solution Design

.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	Y
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	Y
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Recommended Test Cases

Test Case 1: Activity Hierarchy – Field Activity– No Request Orchestrator

1. Repeat Steps To Recreate
2. Observe no issue.

Test Case 2: Activity Hierarchy – Field Activity + Existing Request Orchestrator

1. Repeat Steps To Recreate
2. Observe no issue.

Test Case 3: Activity Hierarchy – Update Orchestration

1. Repeat Steps To Recreate
2. Link into Update Orchestration
3. Observe Update Orchestration highlighted. Full tree populated.

Test Case 4: Activity Hierarchy – Cancel Orchestration

1. Repeat Steps To Recreate
2. Observe Cancel Orchestration populated in activity tree.
