Recommended Test Cases 6
- Test Case 1: Verify that usage is calculated for a single day closing usage transaction when the usage transaction starts on the usage subscription stop date/time and Get TOU Mapped Usage rule is used 6
- Test Case 2: Verify that usage is calculated for a single day closing usage transaction when the usage transaction starts on the usage subscription stop date/time and D2-Math Usage rule is used 7
- Test Case 3: Verify that usage is calculated for a closing usage transaction that is created for two days 7

Reported Issues

Description

On a closing Usage Transaction with an Interval date range that spans exactly one day, the TOU Mapped Usage Rule/D2-Math Usage Rule doesn't load any data into the Usage Transaction. The service agreement was stopped and Start Day Option is set to Current Day in CCB. This allows the bill to be calculated for 24 hours after this stop date. However, the usage transaction created doesn’t have usage calculated on it.

Steps to Recreate

1. Create a device, device configuration, interval MC.
2. Create a service point and install the device on service point.
3. Create measurements on the interval MC from 03-30-2018 12 A.M to 07-25-2018 12:00AM.
4. Create a TOU Group and TOU Map template with On, Mid, Off, Critical peak hours.
5. Create a TOU Map type using the above create TOU map template. Create a TOU map and generate TOU map data.

Copyright ©2026, Oracle. All rights reserved.

6. Create usage calculation group with Get TOU Mapped Usage rule using the above created TOU map template.
7. Create usage subscription with above service point and usage calculation group.
8. Move the usage subscription to inactive status and set the end date/time as 07-24-2018 12 A.M.
9. Create a usage transaction for the following period -

   Start date/time 07-24-2018 12 A.M and End date/time 07-25-2018 12 A.M.
10. Observe that usage is not calculated on the usage transaction.

11. Create usage calculation group with D2-Math Usage rule.
12. Create usage subscription with above service point and usage calculation group.
13. Move the usage subscription to inactive status and set the end date/time as 07-24-2018 12 A.M.
14. Create a usage transaction for the following period -

    Start date/time 07-24-2018 12 A.M and End date/time 07-25-2018 12 A.M.
15. Observe that usage is not calculated on the usage transaction.

Solution Design

In UsageSubscription_Impl.java, make changes such that the service points linked to the usage subscription are considered for further usage calculation when usage transaction starts on the usage subscription end date/time.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N

Change Type	Y/N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Changes

Java changes –

Following java file has been modified:

UsageSubscription_Impl.java

Recommended Test Cases

Test Case 1: Verify that usage is calculated for a single day closing usage transaction when the usage transaction starts on the usage subscription stop date/time and Get TOU Mapped Usage rule is used.

1. Create a device, device configuration, interval MC.
2. Create a service point and install the device on service point.
3. Create measurements on the interval MC from 03-30-2018 12 A.M to 07-25-2018 12:00AM.
4. Create a TOU Group and TOU Map template with On, Mid, Off, Critical peak hours.
5. Create a TOU Map type using the above create TOU map template. Create a TOU map and generate TOU map data.
6. Create usage calculation group with Get TOU Mapped Usage rule using the above created TOU map template.
7. Create usage subscription with above service point and usage calculation group.
8. Move the usage subscription to inactive status and set the end date/time as 07-24-2018 12 A.M.
9. Create a usage transaction for the following period -

   Start date/time 07-24-2018 12 A.M and End date/time 07-25-2018 12 A.M.

   Bill condition - closing
10. Verify that usage is calculated on the usage transaction.

 Copyright ©2026, Oracle. All rights reserved.

Test Case 2: Verify that usage is calculated for a single day closing usage transaction when the usage transaction starts on the usage subscription stop date/time and D2-Math Usage rule is used.

1. Create a device, device configuration, interval MC.
2. Create a service point and install the device on service point.
3. Create measurements on the interval MC from 03-30-2018 12 A.M to 07-25-2018 12:00AM.
4. Create usage calculation group with D2-Math Usage rule.
5. Create usage subscription with above service point and usage calculation group.
6. Move the usage subscription to inactive status and set the end date/time as 07-24-2018 12 A.M.
7. Create a usage transaction for the following period -

   Start date/time 07-24-2018 12 A.M and End date/time 07-25-2018 12 A.M.

   Bill condition - closing
8. Verify that usage is calculated on the usage transaction.

Test Case 3: Verify that usage is calculated for a closing usage transaction that is created for two days.

1. Create a device, device configuration, interval MC.
2. Create a service point and install the device on service point.
3. Create measurements on the interval MC from 03-30-2018 12 A.M to 07-25-2018 12:00AM.

   Case: D2-Math Usage rule
4. Create usage calculation group with D2-Math Usage rule.
5. Create usage subscription with above service point and usage calculation group.

Copyright ©2026, Oracle. All rights reserved.

6. Move the usage subscription to inactive status and set the end date/time as 07-24-2018 12 A.M.
7. Create a usage transaction for the following period -

   Start date/time 07-23-2018 12 A.M and End date/time 07-25-2018 12 A.M.

   Bill condition - closing
8. Verify that usage is calculated on the usage transaction.

   Case: Get TOU Mapped Usage rule
9. Create a TOU Group and TOU Map template with On, Mid, Off, Critical peak hours.
10. Create a TOU Map type using the above create TOU map template. Create a TOU map and generate TOU map data.
11. Create usage calculation group with Get TOU Mapped Usage rule using the above created TOU map template.
12. Create usage subscription with above service point and usage calculation group.
13. Move the usage subscription to inactive status and set the end date/time as 07-24-2018 12 A.M.
14. Create a usage transaction for the following period -

    Start date/time 07-23-2018 12 A.M and End date/time 07-25-2018 12 A.M.

    Bill condition - closing
15. Verify that usage is calculated on the usage transaction.
