The information contained in this document is proprietary and confidential to Oracle and is subject to the non-disclosure obligations described in the license agreement between your company and Oracle. You may not provide this document or any copy of this document to third parties outside your company unless you first obtain the written permission of Oracle.

This document introduces new and changed business and technical features that Oracle has included in the ”Single Fix” described in this document.

The functionality of the Single Fix described in this document may be superseded by functionality included in a future Single Fix, Release or Update. Oracle reserves the right to revise or expand the functionality of any future Single Fix, Release or Update of Oracle Utilities Service and Measurement Data Foundation in a manner compatible with Oracle’s business objectives, and the business objectives of each of Oracle’s customers, at the time that Oracle makes the software code generally commercially available.

Oracle will provide you with additional information concerning product Releases or Updates after Oracle finalizes the related specifications and tests the product component(s). Final documentation will be shipped to you with the media containing the Release or Update.

Please contact Oracle Customer Service Group if you have any questions or comments concerning this document, which has been prepared for your benefit as a licensee of Oracle Utilities Service and Measurement Data Foundation.

Reported Issue

Description

Unable to view device in 360 Search by Device if usage subscription is Inactive.

Steps To Recreate

1. Create a Device.
2. Create a Service Point.
3. Install the Device to the Service Point on 01/01/2023.
4. Create and activate a Usage Subscription for the Service Point on 01/01/2023.
5. Stop service on the Usage Subscription and set the status to inactive on 05/01/2023.
6. Perform a 360 Search for the Device using the Badge Number.

Solution Design

Summary

Modify the zone query for inactive US to take into consideration the device's install and removal dates

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	Y
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Zones

[Updated] D2-360SRCDV “Search by Device”

Data Clean-Up / Fixes

Not applicable

Recommended Test Cases

Note) For these test cases, date and Time values must not be in future.

Test Case 1: Device installed on SP with an inactive US

1. Create a Device.
2. Create a Service Point.
3. Install the Device to the Service Point on 01/01/2020.
4. Create and activate a Usage Subscription for the Service Point on 01/01/2023.
5. Stop service on the Usage Subscription and set the status to inactive on 05/01/2023.
6. Perform a 360 Search for the Device using the Badge Number.
7. 360 should display one row with US empty

Test Case 2: REGRESSION: Device installed on SP with an inactive US

1. Create a Device.
2. Create a Service Point.
3. Install the Device to the Service Point on 01/01/2020.
4. Create and activate a Usage Subscription for the Service Point on 01/01/2023.
5. Have Service Point Stop Date/Time removed.
6. Perform a 360 Search again for the Device using the Badge Number.

Copyright ©2026, Oracle. All rights reserved.

7. 360 should display one row with US empty

Test Case 3: REGRESSION: Device installed on SP with previous inactive US

1. Create 2 Devices.
2. Create 1 Service Point.
3. Install Device 1 to the Service Point on 01/01/2022.
4. Create and activate 1 Usage Subscription for the Service Point on 01/01/2023.
5. Stop service on the Usage Subscription 1 and set the status to inactive on 05/01/2023.
6. Create and activate another Usage Subscription for the Service Point on 05/01/2023.
7. Remove Device 1 on 07/01/2023.
8. Install Device 2 on 07/01/2023.
9. Perform a 360 Search for the Device using the Badge Number.
10. There should be no extra result with empty US

Test Case 4: Device on an inactive US with a stopped SP

1. Create a Device.
2. Create a Service Point.
3. Install the Device to the Service Point on 01/01/2022.
4. Create and activate a Usage Subscription for the Service Point on 01/01/2023.
5. Stop service on the Usage Subscription and set the status to inactive on 05/01/2023.
6. Perform 360 search by device using badge number
7. Verify that only one result is returned with empty US
