Reported Issue

Description

In the Service Guide “Create Customer Contact” wrap-up flow, the wrap-up event isn’t correctly capturing agent changes:

- If an agent edits the Summary, the data sent out of the source system considers Summary as non edited.
- If an agent changes or selects Tags, the data sent out of the source system doesnot include edited Tags.

Note : This bug fix also serves as the copy/fix for the following stories/epics.

- UGBUPD-20625 Service Guide - Access Mode for Summarize Customer Contact.
- CCB-73105 Enhance Summarize button behavior - 'Add Customer Contact' UI Enhancements.
- CCB-77137 Address Customer Contact UI map gaps found during Service Guide native integration.

Steps to Recreate

Reported Issue

- Initialize service guide and trigger the customer contact creation by posting a serviceGuideCis:wrapup:initiated event.
- Select a **Contact Class** and **Contact Type** in the Select Type Screen.

Selected Contact Class and Contact Type

- After selecting a **Contact Class** and **Contact Type**, Customer Contact maintenance screen should load with the pre-filled notes/comments.

Copyright ©2026, Oracle. All rights reserved.

CC Maintenance Screen loaded with pre-filled comments

- Populate required fields and click on the "**Summarize**" button.

Copyright ©2026, Oracle. All rights reserved.

Changes after clicking Summarize

- Edit the Summary text area and Tags dropdown.

Edited Summary and Tags

- Click on Save.

Copyright ©2026, Oracle. All rights reserved.

Customer Contact

- Inspect the console of the UI Map and observe the payload.

Payload After Saving

- **Expected Result:** The editedSummary and editedTags should appear at the top (standard) level of the event payload.
- **Actual Result:** The editedSummary and editedTags appear one level deeper than expected due to an extra wrapper layer (double-wrapped payload)

Solution Design

- Modify the Service Guide Map Zone UI map message handling to pass the correct payload data object to the Customer Contact save-attempt flow.
- Additionally apply/copy the fixes/enhancements implemented for the listed stories/epics from 26.4 into 25.10.

Other Changes

UI Map

C1-CustomerContactMaintFrag (Existing)

- Updated UI Map to:
  - To trigger the reload of UI Map based on whether the error banner is currently visible rather than whether prior error text exists.
  - Send editedTags as an array of tag codes only when the Customer Contact tags differ from the Service Guide sent tags.
  - Modify Summarize button behavior in Add Customer Contact Screen based on system responses and user actions and display it only for eligible users who have access.

Application Service

Customer Contact (CILCCSCP) (Existing)

Property	Value
Code	CILCCSCP
Description	Customer Contact
Access Modes	Add Change AI Summarization (new) Display Letter Inquire
User Groups	

Changes

- Added a new Access mode.
  - AI Summarization

Copyright ©2026, Oracle. All rights reserved.

JS

c1ServiceGuideNativeMessageHandler.js(Existing)

_customerContactSaved () (Existing)

- Correct the message payload structure which is sent as input to _sendServiceGuideMessage function to ensure correct message payload mapping for wrapupdone event.

Lookup

Access Mode(ACCESS_MODE) (Existing)

Properties

Property	Value
Field Name	ACCESS_MODE
Customizable	False
Java Field Name	accessMode

Values

Field Value	Description	Java Value Name
C1SM (new)	AI Summarization	aiSummarization

Data Clean-Up / Fixes

- None.

Recommended Test Cases

Test Case 1: Reported Issue - Verifying Service Guide wrap-up payload for Summary and Tag edits

- Initialize service guide and trigger the customer contact creation by posting a serviceGuideCis:wrapup:initiated event.

 Copyright ©2026, Oracle. All rights reserved.

- Select a **Contact Class** and **Contact Type** in the Select Type Screen.
- After selecting a **Contact Class** and **Contact Type**, Customer Contact maintenance screen should load with the pre-filled notes/comments.
- Populate required fields and click on the "**Summarize**" button.
- Edit the Summary text area and Tags dropdown.
- Click on Save.
- Inspect the console of the UI Map and observe the payload.
- **Expected Result:** The editedSummary and editedTags should appear at the top (standard) level of the payload.

Test Case 2: Verifying that a user with AI Summarization access can view and use the Summary feature, and that the Summarize button is enhanced

- Create a User Group with AI Summarization access.
- Assign the User Group created above to a user.
- Initialize service guide and trigger the customer contact creation by posting a serviceGuideCis:wrapup:initiated event.
- Select a **Contact Class** and **Contact Type** in the Select Type Screen.
- After selecting a **Contact Class** and **Contact Type**, Customer Contact maintenance screen should load with the pre-filled notes/comments.
- Populate required fields and click on the "**Summarize**" button.
- Edit the Summary text area and Tags dropdown.
- Click on Save.
- **Expected Result:** User with AI Summarization access should be able to view the Summary feature; clicking Summarize generates a summary successfully and the button behaves as expected.

Test Case 3: Verifying that a user without AI Summarization access cannot view and use the Summary feature

- Create a User Group without AI Summarization access.
- Assign the User Group created above to a user.

Copyright ©2026, Oracle. All rights reserved.

- Initialize service guide and trigger the customer contact creation by posting a serviceGuideCis:wrapup:initiated event.
- Select a **Contact Class** and **Contact Type** in the Select Type Screen.
- After selecting a **Contact Class** and **Contact Type**, Customer Contact maintenance screen should load with the pre-filled notes/comments.
- Populate required fields and click on the "**Summarize**" button.
- Click on Save.
- **Expected Result:** User without AI Summarization access should not be able to see or use the Summarize button feature.

Test Case 4: Verifying that Service Guide error messages are displayed correctly on the “Create Customer Contact” screen after the user dismisses a previous CCS error message and a new error occurs

- Initialize service guide and trigger the customer contact creation by posting a serviceGuideCis:wrapup:initiated event.
- Select a **Contact Class** and **Contact Type** in the Select Type Screen.
- After selecting a **Contact Class** and **Contact Type**, Customer Contact maintenance screen should load with the pre-filled notes/comments.
- Click on Save.
- Close the error and trigger CCS Error.
- **Expected Result:** Service Guide error message should be displayed correctly on the “Create Customer Contact” screen when a new error occurs after the previous CCS error message was dismissed.
