Reported Issue

Description

From the Validation Error Summary page, users can open Field Activity validation detail entries. However, the navigation buttons on the Validation Detail page do not work. Clicking them for any Field Activity entry does nothing.

Steps to Recreate

Data Setup

- Create a batch job submission for **Validate field activity** (***VAL-FA***) batch control.
  - Set the **SKIP-ROWS** parameter to a value greater than ***25*** to avoid processing a large number of records.

Batch Job Submission: VAL-FA

- After the batch job completes, check the database for **CI_VAL_ERR** table entries where **TBL_NAME** is set to ***CI_FA*** and **NAVIGATION_KEY** is set to ***fieldActivityMainPage***.

SQL for Selecting CI_FA Validation Error Records with Incorrect Navigation Key

Copyright ©2026, Oracle. All rights reserved.

```
SELECT * FROM CI_VAL_ERR
WHERE TBL_NAME = 'CI_FA'
    AND NAVIGATION_KEY = 'fieldActivityMainPage';
```

SQL for Selecting Field Activity Validation Error Records with Incorrect Navigation Key

- If the query returns any results, proceed to the Reported Issue.

Reported Issue

- Identify **CI_VAL_ERR** records where **TBL_NAME** is set to ***CI_FA*** and **NAVIGATION_KEY** is set to ***fieldActivityMainPage***.

SQL for Selecting CI_FA Validation Error Records with Incorrect Navigation Key

`SELECT * FROM CI_VAL_ERR`
`WHERE TBL_NAME = 'CI_FA'`
`  AND NAVIGATION_KEY = 'fieldActivityMainPage';`

SQL for Selecting Field Activity Validation Error Records with Incorrect Navigation Key

- From the SQL query results, choose a specific validation error record to use for replication.

```
SELECT
    TBL_NAME, CI_ID, USER_ID, CRE_DTTM,
    MESSAGE_CAT_NBR, MESSAGE_NBR, NAVIGATION_KEY,
    MESSAGE_PARM1, MESSAGE_PARM2, MESSAGE_PARM3
FROM CI_VAL_ERR
WHERE TBL_NAME = 'CI_FA'
    AND NAVIGATION_KEY = 'fieldActivityMainPage'
    AND USER_ID = 'SVDELACR'
ORDER BY CRE_DTTM DESC;
```

Query Result | SQL | Fetched 50 rows in 0.203 seconds

	TBL_NAME	CI_ID	USER_ID	CRE_DTTM	MESSAGE_CAT_...	MESSAGE_NBR	NAVIGATION_KEY	MESSAGE_PARM1	MESSAGE_PARM2	MESSAGE_PARM3
1	CI_FA	5899757128	SVDELACR	03/04/2026	11001	1020	fieldActivityMainPage	2005-09-01-01:01	yyyy-MM-dd	
2	CI_FA	0030640999	SVDELACR	03/04/2026	9	12002	fieldActivityMainPage			
3	CI_FA	0050199973	SVDELACR	03/04/2026	9	12002	fieldActivityMainPage			
4	CI_FA	0149288635	SVDELACR	03/04/2026	9	12002	fieldActivityMainPage			
5	CI_FA	0215903880	SVDELACR	03/04/2026	9	12002	fieldActivityMainPage			
6	CI_FA	0259613765	SVDELACR	03/04/2026	9	12002	fieldActivityMainPage			
7	CI_FA	0358491836	SVDELACR	03/04/2026	9	12002	fieldActivityMainPage			
8	CI_FA	0409291598	SVDELACR	03/04/2026	9	12009	fieldActivityMainPage	0407426375	START	
9	CI_FA	0481169254	SVDELACR	03/04/2026	9	12002	fieldActivityMainPage			
10	CI_FA	0581902853	SVDELACR	03/04/2026	9	12002	fieldActivityMainPage			
11	CI_FA	0600958389	SVDELACR	03/04/2026	9	12002	fieldActivityMainPage			
12	CI_FA	0622873795	SVDELACR	03/04/2026	9	12002	fieldActivityMainPage			

Validation Error Entry with Message Category (11001), Number (1020), Parameter 1 (2005-09-01:01) and Parameter 2 (yyyy-MM-dd)

- Navigate to the Validation Error Summary page.
- In the **Table Name** search field, enter ***CI_FA*** and run the search.
- From the Validation Error Summary results, identify the entry that matches the selected message category and message number. Then, click on the navigation button.

Copyright ©2026, Oracle. All rights reserved.

Validation Error Summary Entry with Message Category (11001) and Number (1020)

- In the Validation Details page, click on the navigation button.

Validation Details Entry with Message Parameter 1 (2005-09-01:01) and Parameter 2 (yyyy-MM-dd)

Expected Result: On click, the user should be redirected to the Field Activity page with the appropriate context loaded. The Field Activity ID displayed should match the **CI_ID** value in the database for the selected validation error entry.

Actual Result: Clicking the navigation button does nothing. No page is opened, and no navigation occurs.

Solution Design

Update the **VALIDATION OF CI_FA** (***ProgramCIPVFACB***) so that when it creates a Field Activity validation error record in the **CI_VAL_ERR** table, it sets the **NAVIGATION_KEY** value to ***faMaint*** rather than ***fieldActivityMainPage***. Additionally, update the configurations of the program in the COBOL converted program page such that the **NAV_KEY** parameter is also set to ***faMaint***.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	Y
Is there an impact on any batch process?	Y
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Translated Java Program

VALIDATION OF CI_FA (ProgramCIPVFACB) (Existing)

Business Rules

- The generated field activity validation error entries now use a navigation option specifically designed for field activity ***Go To*** **Navigation Usage**. This allows users to open the related field activity from the Validation Detail page. The previously assigned navigation value has been replaced because it was not configured to support this navigation path.

Copyright ©2026, Oracle. All rights reserved.

Other Changes

Converted COBOL Program

COBOL Conversion Validation dr for CI_FA (CIPVFACB) (Existing)

Change the value of **NAV_KEY** from ***fieldActivityMainPage*** to ***faMaint***.

Variable Name	Occurence	Variable Sequence	Variable Value
NAV_KEY	S	0	~~fieldActivityMainPage~~ faMaint

Data Clean-Up / Fixes

Validation error records for Field Activity that were created before the fix contain an invalid navigation value and will continue to have non-working navigation unless updated. To identify affected records, run the following query:

SQL for Selecting CI_FA Validation Error Records with Incorrect Navigation Key

```
SELECT * FROM CI_VAL_ERR
WHERE TBL_NAME = 'CI_FA';
    AND NAVIGATION_KEY = 'fieldActivityMainPage'
```

SQL for Selecting Field Activity Validation Error Records with Incorrect Navigation Key

For these records, set the **NAVIGATION_KEY** value to the valid field activity navigation option:

SQL for Updating Incorrect Navigation Key for CI_FA Validation Error Records

```
UPDATE CI_VAL_ERR
SET NAVIGATION_KEY = 'faMaint'
WHERE TBL_NAME = 'CI_FA'
   AND NAVIGATION_KEY = 'fieldActivityMainPage';
```

SQL for Updating Incorrect Navigation Key for Field Activity Validation Error Records

After this data clean-up, the navigation from the Validation Detail page will work correctly for both existing and newly generated Field Activity validation error entries.

Recommended Test Cases

Test Case 1: Verify Navigation Key for Newly Generated Field Activity Validation Errors

- Create a batch job submission for **Validate field activity** (***VAL-FA***) batch control.
  - Set the **SKIP-ROWS** parameter to a value greater than ***25*** to avoid processing a large number of records.
- After the batch completes, run the following SQL query in the database:

SQL for Selecting All CI_FA Validation Error Records
`SELECT * FROM CI_VAL_ERR` `WHERE TBL_NAME = 'CI_FA';`

SQL for Selecting All Field Activity Validation Error Records

- Review newly created Field Activity validation error records.
  - Filter by ***USER_ID*** or sort by ***CRE_DTTM*** to easily identify records generated by the latest batch run.
- **Expected Result:** New Field Activity validation error records are created with the **NAVIGATION_KEY** column set to ***faMaint***.

Test Case 2: Verify Navigation from Validation Detail Page to Field Activity Page for New CI_FA Errors

- Identify a Field Activity validation error created by the latest **Validate field activity** (***VAL-FA***) batch run.
- Navigate to the Validation Error Summary page.
- In the **Table Name** search field, enter ***CI_FA*** and run the search.
- Click the navigation button to open the Validation Detail page.
- On the Validation Detail page, click the navigation button for the selected entry.

Copyright ©2026, Oracle. All rights reserved.

- **Expected Result:** The Field Activity page opens and displays the correct Field Activity record. The Field Activity ID matches the ***CI_ID*** value in the database for the selected validation error entry.
