Reported Issue

Description

Usage Request Scalar Start Date/Time is 24 hours too early on Closing Bill Segment.

Steps To Recreate

Data Setup

- Set the ***Initial Start Date*** option as ***Add 1 Day always*** in the Billing Tab of SA type E-RESAOH.

Reported Issue

- Create a W model.

Copyright ©2026, Oracle. All rights reserved.

Account

- Add a device and its device configuration.

Device

Device Configuration

Copyright ©2026, Oracle. All rights reserved.

- Install the device on the Service Point (SP).

Service point

Add Install Event

Copyright ©2026, Oracle. All rights reserved.

Install Event

- Add a scalar measuring component for the device configuration and enter reads for billing.

Measuring Component - Scalar

- Add an interval measuring component on the same device configuration and enter the reads.

Copyright ©2026, Oracle. All rights reserved.

Measuring Component - Interval

- Activate the Service agreement.

Service Agreement - Active

- Generate an initial bill from 08-09-2021 to 08-10-2021 and complete it.

Copyright ©2026, Oracle. All rights reserved.

Initial Bill

Usage Request – Initial Bill

- Generate an interim bill from 08-10-2021 to 09-10-2021 and complete it.

Copyright ©2026, Oracle. All rights reserved.

Interim Bill

Usage request – Interim Bill

- Stop the service agreement with stop date as 10-10-2021.

Copyright ©2026, Oracle. All rights reserved.

Service Agreement - Stopped

- Generate the closing bill for the account till 10-10-2021.

Closing Bill

- Verify the Scalar Processing Information in the usage request of closing bill.

Copyright ©2026, Oracle. All rights reserved.

Usage Request-Closing Bill

Expected Result: For the closing bill, the Scalar Usage Period Start Date/Time should be end date/Time of the previous usage period.

Actual Result: The Scalar Usage Period Start Date/Time of the closing bill overlaps with the previous usage period.

Solution Design

- Modify the ***UsageRequestConsumptionHelper*** routine to update the Scalar Processing Information Start Date/Time for the closing bill segment, ensuring it is set to the previous usage End Date/Time.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	Y
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Translated Java Routines

UsageRequestConsumptionHelper_Impl(Existing)

Business Rules

Method: populateScalarStartDateTime(Existing)

- …
- If Bill is ~~interim~~ not initial
  - set the ***startDateTime*** to the ***endDateTime*** of the previous Bill segment.
- …

Data Clean-Up / Fixes

- None.

Recommended Test Cases

Test Case 1: Reported Issue

- Refer to Steps to Recreate.
- Generate a closing bill.
- **Expected**: For the closing bill, the Scalar Usage Period Start Date/Time should be end date/time of the previous usage period.

Test Case 2: Verify Scalar Start Date/Time for the Bill condition "Initial and Closing"

- Generate a single bill that is an initial and closing bill.
- Verify that the scalar start date time and end date time are appropriate.
