The information contained in this document is proprietary and confidential to Oracle and is subject to the non-disclosure obligations described in the license agreement between your company and Oracle. You may not provide this document or any copy of this document to third parties outside your company unless you first obtain the written permission of Oracle.

This document introduces new and changed business and technical features that Oracle has included in the"Single Fix" described in this document.

The functionality of the Single Fix described in this document may be superseded by functionality included in a future Single Fix, Release or Update. Oracle reserves the right to revise or expand the functionality of any future Single Fix, Release or Update of Framework in a manner compatible with Oracle's business objectives, and the business objectives of each of Oracle's customers, at the time that Oracle makes the software code generally commercially available.

Oracle will provide you with additional information concerning product Releases or Updates after Oracle finalizes the related specifications and tests the product component(s). Final documentation will be shipped to you with the media containing the Release or Update.

Please contact Oracle Customer Service Group if you have any questions or comments concerning this document, which has been prepared for your benefit as a licensee of Framework.

Description
Steps To Recreate

Description

When using the Batch Job Submission query, if you see a run number that has reruns associated with it, clicking the link on the original run number brings you to the batch run page, but with an error and no data visible. This does not happen if you drill in on any of the reruns or if you drill in on a batch job that doesn't have any reruns.

Steps To Recreate

> Go to batch job submission and display the jobs for a batch control where there are reruns. Note that the page displays "N (Rerun X)" in the Batch Number column for the batch run that is the rerun.
> Find the original run, where the Batch Number column just has the run number N. Click the link.
You are brought to the Batch Run page with the error "The server has encountered a problem. Please contact your system administrator."

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N

The following questions are only applicable to products built on Oracle Utilities Application Framework version 22A / 4.5.0.0.0 or earlier.

Change Type	Y/N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

FW Changes

A navigation option related to the navigation was incorrectly configured. That is fixed.

Recommended Test Cases

Follow the steps to recreate. Now when clicking the Batch Number for the original batch number that has reruns, you should successfully navigate to the Batch Run page.

Also confirm that clicking the batch number for other types of runs continues to work. Try a batch job that has no reruns. And try a batch job that is one of the reruns.
