Reported Issue

Description

Duplicate ODM SP sync requests are created during Service Point creation.

Steps to Recreate

1. Create a new Service Point.
2. Observe that two ODM SP sync requests are created.

Solution Design

Move the Service Point characteristics defaulting logic from BPA script X1-SPMain (Service Point Maintenance) to the new post-processing script X1-DefSPChar on the X1D-ServicePoint BO, so that Service Point creation and SP characteristic defaulting occur within the same transaction, resulting in only one audit call.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Changes

- Script: X1-SPMain (Existing)
- Algorithm Type: X1-DEFSPCHAR (New)
- Algorithm: X1-DEFSPCHAR (New)
- Script: X1-DefSPChar (New)
- Business Object: X1D-ServicePoint (Existing)

Recommended Test Cases

Test Case 1: Verify that only a single ODM SP sync request is created when a Service Point is created.

1. Create a new Service Point.
2. Verify that only 1 sync request of BO: D1-ODMSPSyncRequest is created.
3. Update the Service Point and verify that a new ODM SP sync request is created.

Test Case 2: Verify that the required Service Point characteristics are correctly defaulted when the Service Point is created through the UI, and that subsequent changes to Service Point characteristics are properly synchronized with the CCB Service Point.

1. Create a new Service Point.
2. Verify that the SP characteristics are defaulted correctly on the SP.
3. Modify the Service Point characteristics.

Copyright ©2026, Oracle. All rights reserved.

4. Verify that the updates are properly synchronized with the CCB Service Point.

Test Case 3: Verify that a single ODM SP sync request is created when a Service Point is created through IWS.

1. Submit an iws request for X1-servicepoint.
2. Verify that only 1 sync request of BO: D1-ODMSPSyncRequest is created.
