Reported Issue

Description

In emails generated by the External Routing algorithm (***C1-CREMAILTD***), the embedded hyperlink redirects the user correctly only on initial use and any subsequent use fails to take the user to the intended page.

Configure the Create To Do from Case Algorithm

Algorithm

Main

Algorithm	ZZGUCTDCASE
Description	ZZ Bug 38900687 Create To Do for Case
Algorithm Type	Create To Do Entry
Algorithm Entity	Case Type - Enter Status

Detailed Description

This algorithm creates a To Do entry when a case enters a given state. The To Do entry is created using the To Do Type.

The system will automatically link a characteristic to the To Do entry that references the related case if it can find a foreign-

The To Do entry will be created in the Assigned state and assigned to the case's responsible user if: 1) Assign To Rule is R A

Otherwise, the case will be created in the Open state. If To Do Role is specified, the entry will be assigned to this role. Other

Algorithm Versions

Configure External Routing Algorithm

Algorithm

Main

Algorithm	ZZGUCEMAILTD
Description	ZZ Bug 38900687 Create Email To Do
Algorithm Type	Create Email For To Do
Algorithm Entity	To Do Type - External Routing
Script	Create Email To Do

Detailed Description

This algorithm creates an outbound message that sends email related to the To Do Entry b

If the To Do Entry is 'Open', the email will be sent to all users linked to the To Do Role that h
address for the email is determined by the third parameter.

The email information is built as follows:
- The subject of the email is the To Do Entry's message text.
- The text body of the email includes the word "Instructions" followed by the text from the
related record in the target environment.
- Additional information is shown with the sort key label / value pairs from the To Do Entry
- The Environment URL parameter may be used to override the URL string in the hyperlink
server from the environment configuration file. When populating the Environment URL, no
variable may be specified for all or part of this parameter. Refer to URI Validation and Subs

Algorithm Versions

Effective Date	Parameters		
	Sequence	Parameter	Value
	10	Outbound Message Type	ZZGUC-EMAIL
	20	External System	ZZGUC-EMAIL
01-01-1950	30	Email From Address	noreply@oracle.com

Reference the base owned algorithm type (C1-CREMAILTD). Configure an External System that send emails.

Configure External System and Outbound Message Type

Steps

1. Add a case using the new Case Type.
2. Transition to the “Fees Paid” status.
3. Verify that a To Do was created.

Copyright ©2026, Oracle. All rights reserved.

Case Type	ZZBug 38900687 Case To Do Email
Status	Fees PaidCase has 1 Open and 0 Completed To Do entries.
Comments	
Script	
Person	ZZMIDTESTBUGPERSON, CCB-38900687-01
Account	ZZMIDTESTBUGPERSON, CCB-38900687-01, Residential, $0.00
Premise	ZZMIDTESTBUG PREMISE 38900687-01, South San Francisco, CA, 94107

4. Navigate to the To Do Entry using the hyperlink from the case.

To Do	ZZ Bug 38900687 To Do Type (ZZGUC-EM),Assigned, Opened Today
	1 Related To Dos
To Do Type	ZZ Bug 38900687 To Do Type
To Do Role	Customer Information Errors

Record Information

To Do ID	35659421889621
Business Object	To Do Entry
Create Date/Time	02-03-2026 07:05AM
Assigned Date/Time	02-03-2026 07:06AM

5. Assign the To Do to the current user.
6. Run the batch F1-TDEER
7. Verify that an email was sent to the current user.

Copyright ©2026, Oracle. All rights reserved.

8. Use the hyperlink on the email to navigate to the case page. Verify that on the 1st attempt, the user is correctly redirected.

Expected Result:

On subsequent use of the hyperlink, the user is redirected to the Case page.

Actual Result:

On subsequent use of the hyperlink, the user is not redirected to the Case page.

Solution Design

Include an extra parameter to the hyperlink (***"&initNav=false")*** so that it redirects to the intended page on every use.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	Y
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Plug-in Spot: To Do Type – External Routing (F1ER) (Existing)

Algorithm Type: Create Email For To Do (C1-CREMAILTD) – (Change)

- Add an extra parameter to the hyperlink to ensure that the user is navigated to the page all the time.

Business Rules

- In Step 150 (Build hyperlink URL)
  - Concatenate hyperlink
    - Environment URL
    - BPA Script
    - Drill Key 1
    - Navigation Option
    - PK Value
    - Init Navigation (***new***) – set to ***"&initNav=false"***
  - Existing logic

Data Clean-Up / Fixes

Not applicable

Recommended Test Cases

Test Case 1: Reported Issue

- Follow steps to recreate.
- Expected results: User is always redirected to the correct page when using the hyperlink.
