The information contained in this document is proprietary and confidential to Oracle and is subject to the non-disclosure obligations described in the license agreement between your company and Oracle. You may not provide this document or any copy of this document to third parties outside your company unless you first obtain the written permission of Oracle.

This document introduces new and changed business and technical features that Oracle has included in the"Single Fix" described in this document.

The functionality of the Single Fix described in this document may be superseded by functionality included in a future Single Fix, Release or Update. Oracle reserves the right to revise or expand the functionality of any future Single Fix, Release or Update of Framework in a manner compatible with Oracle's business objectives, and the business objectives of each of Oracle's customers, at the time that Oracle makes the software code generally commercially available.

Oracle will provide you with additional information concerning product Releases or Updates after Oracle finalizes the related specifications and tests the product component(s). Final documentation will be shipped to you with the media containing the Release or Update.

Please contact Oracle Customer Service Group if you have any questions or comments concerning this document, which has been prepared for your benefit as a licensee of Framework.

Description
Steps To Recreate

Description

The GenericInsertProcess.java and GenericInsertSQLHelper.java does not handle records where CHAR_TYPE_CD is nullable, blank, or whitespace for tables that have CHAR_ENTITY_FLG configured in the CI_MD_TBL.

Steps To Recreate

1. Create the required data for Usage. This must be done in the Staging environment.
    a. Premise → Service Point (SP) → Service Agreement (SA) → Bill → Usage
2. Run the Assign Production Keys - Generate Keys for C1_Usage (C1USE01K) batch control
3. Run the Added Insertion to Production batch controls in the following order:
    - Insert C1_USAGE (C1USE01I)
    - Insert C1_USAGE_CHAR (C1USE02I)
    - Insert C1_USAGE_LOG (C1USE03I)
    - Insert C1_USAGE_LOG_PARM (C1USE04I)
4. Check C1_USAGE_LOG in the Staging DB and Production DB

Data for C1_USAGE_LOG is not inserted into the Production DB

Summary
FW Changes

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N

The following questions are only applicable to products built on Oracle Utilities Application Framework version 22A / 4.5.0.0.0 or earlier.

Change Type	Y/N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

FW Changes

Update the implementation of generic insert process.

Recommended Test Cases

Perform steps to recreate.
