Reported Issue

Description

When Usage subscription has two Dynamic option types configured for the same duration and both the Dynamic Options has respective TOU maps then TOU map related to one is getting picked up.
Currently Two Dynamic Options are configured for the TOU map, if both dynamic Options are present on the usage subscription as well for the bill duration then associated SQI/TOU combination from both dynamic options/TOU Map combination should appear in usage transaction.

Steps to Recreate

1) Create required V set up for Interval MC.
2) Create “Get TOU Mapped” usage group/rule with Enforce US Dynamic Option is Yes.
3) Configure the usage group to the US Type.
4) Create TOU Map with dynamic options configured.
5) Generate TOU Map data and Interval measurements.
6) Create a Usage Subscription with effective Dynamic options configured and NO Dynamic Option Overrides.
7) Add the usage group to the US
8) Configure Dynamic options on the TOU Map.
9) Create a UT.
10) Only one of the Dynamic Options configured on the TOU Map is applied in UT.

Solution Design

Apply TOU Mapping business component

- The code change is in the ApplyTOUMapping_Impl.java common routine to convert Usage Subscription - Dynamic Option and Dynamic Opt. Override date/times from legal to standard and compare against Dynamic Option effective and expiration date/times. Fix is in enforceUSDynamicOptions(...) method.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N

Copyright ©2026, Oracle. All rights reserved.

Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Recommended Test Cases

Test Case 1: Effective Dynamic Option Interval Set's defined on the US, Enforce US Dynamic Option is Yes and NO Dynamic Option Overrides

1) Create required V set up for Interval MC.
2) Create "Get TOU Mapped" usage group/rule with Enforce US Dynamic Option is Yes.
3) Configure the usage group to the US Type.
4) Create TOU Map with Dynamic Option Interval Set's configured.
5) Generate TOU Map data and Interval measurements for **15 min SPI**.
6) Create a Usage Subscription with effective Dynamic option Interval Set's configured and NO Dynamic Option Overrides. Add the usage group to the US.
7) Configure Dynamic option Interval Set's on the TOU Map.
8) Create a UT.
9) Dynamic Option Interval Set's configured on the US is applied in UT.

Test Case 2: Effective Dynamic Option's defined on the US, Enforce US Dynamic Option is Yes and NO Dynamic Option Overrides

1) Create required V set up for Interval MC.
2) Create "Get TOU Mapped" usage group/rule with Enforce US Dynamic Option is Yes.
3) Configure the usage group to the US Type.
4) Create TOU Map with Dynamic Option's configured.
5) Generate TOU Map data and Interval measurements for **15 min SPI**.
6) Create a Usage Subscription with effective Dynamic option's configured and NO Dynamic Option Overrides. Add the usage group to the US.
7) Configure Dynamic options on the TOU Map.
8) Create a UT.
9) Dynamic Option's configured on the US is applied in UT.

Copyright ©2026, Oracle. All rights reserved.

Test Case 3: Dynamic Options defined on the TOU Map, Enforce US Dynamic Option is No

1) Create required V set up for Interval MC.
2) Create “Get TOU Mapped” usage group/rule with Enforce US Dynamic Option is NO.
3) Configure the usage group to the US Type.
4) Create TOU Map with dynamic options configured.
5) Generate TOU Map data and Interval measurements.
6) Create a Usage Subscription with NO Dynamic options configured. Add the usage group to the US.
7) Configure Dynamic options on the TOU Map.
8) Create a UT.
9) Dynamic Options configured on the TOU Map were applied in UT.

Test Case 4: Effective Dynamic Option Interval Set’s defined on the US, Enforce US Dynamic Option is Yes and Active Dynamic Option Overrides

1) Create required V set up for Interval MC.
2) Create “Get TOU Mapped” usage group/rule with Enforce US Dynamic Option is Yes.
3) Configure the usage group to the US Type.
4) Create TOU Map with dynamic option Interval Set’s configured.
5) Generate TOU Map data and Interval measurements.
6) Create a Usage Subscription with effective Dynamic option Interval Set’s configured and Active Dynamic Option Overrides.
7) Add the usage group to the US.
8) Configure Dynamic option Interval Set’s on the TOU Map.
9) Create a UT.
10) Dynamic Option Interval Set’s configured on the US is applied in UT and the events effective for the calculation period is excluded from the calculation.

Test Case 5: Perform the above test cases for “Vector and SQ Math” usage rule
