Description

Last Assigned Date/Time as displayed on "To Do Search" and "To Do List" screens shows the incorrect date/time in the following situations.

1. It would incorrectly update the latest assignment Date/Time when a Log Was added (say Priority Recalculation) but the Assigned User had not changed
   It should only update the latest assignment date time if the assigned user is populated and has changed

2. It ignored a situation where if you Assigned it to User X then Re-Opened (Therefore Unassigning)
   then later Re-assigned it back to User X it would report the earlier Date/Time that it was assigned to User X
   and not the start of the most recent assignment.

Steps To Recreate

Issue 1
1. Locate a To Do Entry currently assigned to the logged in User
   Note the Last Assigned Date/Time
2. Manually add a new log entry to record some work done on the To Do Entry

The Last Assigned Date/Time has now incorrectly been updated to be the Date/Time of the latest manual log entry.
Where the expectation is that it should be the date/time of when the To Do entry was most recently assigned to a user.

Issue 2
1. From the To Do Search, Locate a To Do Entry currently Assigned to the Logged on User
2. Re-Open the To To Entry
3. Later - Re-assign the To Do Entry Back to the Original User

Example

Log Seq and Type	Log Date	Assigned User	Expected Last Assigned Date/Time
1 Open	1st Jan	-	
2 Assigned	3rd Jan	USER1	3rd Jan
3 Re-Opened	5th Jan	-	
4 Assigned	8th Jan	USER1	8th Jan

The "Latest Assigned Date/Time" will display as the 3rd of Jan, When It should show 8th of Jan.

Summary
FW Changes

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N

The following questions are only applicable to products built on Oracle Utilities Application Framework version 22A / 4.5.0.0.0 or earlier.

 Copyright ©2026, Oracle. All rights reserved.

Change Type	Y/N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

FW Changes

Make changes so that it will calculate the latest assigned date/time based on both the assigned user changing and the it being a later date/time.
So it will be the date/time of when the To Do entry was most recently assigned to a user.
Also take into account the period of time a To Do Entry was set back to Open status when calculating the assigned date/time.

Recommended Test Cases

See steps to reproduce.

Now the Last Assigned Date/Time is not effected by adding a user log with the same assigned user.
And a period of Open status between being assigned to the same user now correctly calculates the date/time as the the start of the most recent assignment.
