The information contained in this document is proprietary and confidential to Oracle and is subject to the non-disclosure obligations described in the license agreement between your company and Oracle. You may not provide this document or any copy of this document to third parties outside your company unless you first obtain the written permission of Oracle.

This document introduces new and changed business and technical features that Oracle has included in the ”Single Fix” described in this document.

The functionality of the Single Fix described in this document may be superseded by functionality included in a future Single Fix, Release or Update. Oracle reserves the right to revise or expand the functionality of any future Single Fix, Release or Update of Oracle Utilities Customer Care and Billing in a manner compatible with Oracle’s business objectives, and the business objectives of each of Oracle’s customers, at the time that Oracle makes the software code generally commercially available.

Oracle will provide you with additional information concerning product Releases or Updates after Oracle finalizes the related specifications and tests the product component(s). Final documentation will be shipped to you with the media containing the Release or Update.

Please contact Oracle Customer Service Group if you have any questions or comments concerning this document, which has been prepared for your benefit as a licensee of Oracle Utilities Customer Care and Billing.

Reported Issue

Description

On the Start Service Process Flow, Customer Identification Panel (2nd Panel), the Edit button for an existing customer is always displayed and enabled even if there are no configurable fields displayed (such as Date of Birth & Person ID)

Steps To Recreate

- Navigate to the configured Customer Service Request Type for Start Service
- Ensure that the “Prompt For Date of Birth” option is unchecked

Customer Service Request Type – Start Service Request Type

- Navigate to an existing account and create a Start Service Process Flow from the Current Context Zone

Copyright ©2026, Oracle. All rights reserved.

Current Context Zone

- Enter the necessary information. Once you have transitioned to the second panel, confirm the Customer Identification details and press Continue. Note that the “Date of Birth” field is not shown, as configured in the Customer Service Request time.

Customer Identification Panel

Expected Result: The process flow proceeds to the next section, and the edit button does not appear.

Actual Result: The process flow proceeds to the next section, and a non-functional edit button is displayed, even though there are no fields to edit.

Copyright ©2026, Oracle. All rights reserved.

The edit button is displayed, even though there are no fields to edit.

Solution Design

- Update the **Start Stop - New Person Identification Fragment** (***C1-NewPersonIdentificationJS***) UI Map to validate the visibility of editable fields when the panel is locked. If no editable sections are visible, automatically hide the Edit button.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	Y
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

UI Map

Start Stop - New Person Identification Fragment (C1-NewPersonIdentificationJS) (Existing)

Business Rules

- Update the logic within the **customerIdentificationContinue** function to perform a post-rendering check. After the panel transitions to read-only mode, programmatically verify if any editable sections (Date of Birth or Identification Type) are visible. If no such sections are displayed, override the default behavior and hide the Edit button.

Data Clean-Up / Fixes

N/A

Recommended Test Cases

Test Case 1: Reported Issue

- See Steps To Recreate

Expected Result: The process flow proceeds to the next section, and the edit button does not appear.

Test Case 2: Regression – Start Service with “Prompt For Date of Birth” enabled

- See Steps To Recreate
- Ensure that the “Prompt For Date of Birth” option is checked
- You will be prompted to enter a Date of Birth. Fill out the field as needed and press Continue.

Expected Result: The process flow proceeds to the next section, and the edit button is displayed. Pressing the edit button allows you to move back and edit the Date of Birth field.

Test Case 3: Regression – Start Service using a Person with no IDs

- See Steps To Recreate
- Ensure that you are using a person without any existing IDs for the Start Service Process flow.
- You will be prompted to enter an ID Type and ID Number. Fill out the fields as needed and press Continue.

Expected Result: The process flow proceeds to the next section, and the edit button is displayed. Pressing the edit button allows you to move back and edit the ID fields.
