Reported Issue

Description

A SQL Error occurs when a user is associated with multiple User Groups that are linked to the Application Service 'C1-ENCUSBUDACTPROC'. This issue arises during the access check process in CIPCACCP (Account Page Maintenance).

Steps To Recreate

Data Setup:

User is associated with multiple User Groups that are linked to the Application Service 'C1-ENCUSBUDACTPROC'.

- Create or Search an account.

SQL Error is encountered.

Solution Design

- Update the related SQL query to count the number User Groups the user belongs to that grant access to the Application Service 'C1-ENCUSBUDACTPROC'. This ensures that the access check process succeeds regardless of the number of User Groups the user belongs to, as long as one of them is linked to the service.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N

Copyright ©2026, Oracle. All rights reserved.

Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	Y
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Translated Java Routines

ProgramCIPCACCP – Account Page Maintenance (Existing)

Modify as follows:

- Update the CHKACC SQL (Check if User has Access Rights to Enroll Customer on Budget) to count the number User Groups the user belongs to that grant access to the Application Service 'C1-ENCUSBUDACTPROC'.
- Regenerate to reflect the updated SQL query.

SQL: CHKACC (Check if User has Access Rights to Enroll Customer on Budget) (Existing)

```
SELECT
       'X'
      COUNT(UGPR.USR_GRP_ID)
FROM
     SC_ACCESS_CNTL ACC,
     SC_USR_GRP_USR UGU,
     SC_USR_GRP_PROF UGPR
WHERE
     ACC.APP_SVC_ID = 'C1-ENCUSBUDACTPROC'
     AND ACC.ACCESS_MODE = 'F1EX'
     AND UGU.USER_ID = &IN.USER-ID
     AND
             (UGU.EXPIRATION_DT IS NULL
               OR UGU.EXPIRATION_DT >=  &IN.EXPIRATION-DT)
     AND
            (UGPR.EXPIRATION_DT IS NULL
              OR UGPR.EXPIRATION_DT >= &IN.EXPIRATION-DT)
     AND UGPR.USR_GRP_ID = UGU.USR_GRP_ID
     AND ACC.APP_SVC_ID = UGPR.APP_SVC_ID
     AND UGPR.USR_GRP_ID = ACC.USR_GRP_ID
```

ProgramCIPCACCP_Impl – Account Page Maintenance (Existing)

Business Rules

- In ***perform_QA090_SET_RETRO_ENROLL_BUDGET_SW()*** method where it checks if User has access to Enroll Customer on Budget,
    - Update logic to check the count returned by the CHKACC SQL.
        - If not greater than zero, return.

Data Clean-Up / Fixes

Not applicable

Recommended Test Cases

Test Case 1: Reported Issue

- Refer to Steps To Recreate
- Verify that the account page is loaded as expected (i.e. SQL error no longer exists).
