Reported Issue

Description

When editing a Case that has no Person, Account, or Premise linked to it, the Person details are automatically populated from the context during the edit, even though no Person was initially associated with the Case.

Steps To Recreate

Data Setup

- Create a case type with the following configurations.

Case Type

Reported Issue

- Add a case with no person , account or premise of the above case type.

Case Add

Copyright ©2026, Oracle. All rights reserved.

- Click on Save.

Case Add

Case

- Now search for a person and load person into context.

Copyright ©2026, Oracle. All rights reserved.

Person

- Search for Case and input the case id of previously created Case.

Case Query

- Open the Case and click on Edit.

Copyright ©2026, Oracle. All rights reserved.

Case

- Notice how the blank person field is overridden by the person from the context.

Case

Expected Result: The person shouldn't get defaulted from the context when we set the Case Phone Usage on Case Type to Optional.

Copyright ©2026, Oracle. All rights reserved.

Actual Result: The Person is defaulted from the context irrespective of the configuration on the Case Type.

Solution Design

Modify the preprocessing script **Case Maintenace – Pre Processing** (***C1PreCase***) to populate Person from the context when the "Case Phone Usage" configuration on the Case Type is set to "***Required"*** .

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	Y
Is there an impact on any batch process?	N
Is there an impact on CM - Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Other Changes

Script

Case Maintenance - Pre Processing (C1PreCase) (Existing)

Business Rules

- Step 40 : Populate the Person Id from the context only when Case Phone Usage is set to required.

Data Clean-Up / Fixes

Not applicable.

Recommended Test Cases

Test Case 1: Reported Issue

- Refer Steps to Recreate.
- Verify that the person is not automatically defaulted from the context when the Case Phone Usage on the Case Type is set to Optional.
- **Expected Result:** The person shouldn't get defaulted from the context when we set the Case Phone Usage on Case Type to Optional.

Test Case 2: When Case Phone Usage is Not Allowed

- Modify the case type such that Case Phone usage is ***Not allowed***.
- Edit the Case with a person in context.
- Verify that the person isn’t defaulted by the person in context.

Test Case 3: When Case Phone Usage is Required

- Modify the case type such that Case Phone usage is ***Required.***
- Edit the Case with a person in context.
- Verify that the person is defaulted by the person in context.

Test Case 4: Add Case via context

- Go to an existing person.
- Click on case add from the person context.
- Specify the case type.
- Verify that the Person ,Account and Premise are populated on case popup.
