Description
Steps To Recreate

Description

When CSP is enabled in report-only mode, we want to collect all external domain calls that violate the CSP policy (blocked-uri values) and send them as custom spans/events to Oracle APM or log them in browser console for on-prem environments. This enables proactive identification of unauthorized external connections and potential security issues.

Steps To Recreate

This is an enhancement not a bug.

Summary
FW Changes

Summary

Change Type	Y/N

Copyright ©2025, Oracle. All rights reserved.

Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N

The following questions are only applicable to products built on Oracle Utilities Application Framework version 22A / 4.5.0.0.0 or earlier.

Change Type	Y/N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

FW Changes

Added report-uri servlet path to CSP report-only header that will send CSP violated blocked uris to this cspReportServlet and on a new login/reload , this allow list is fetched and sent to APM or logged in browser console for non APM environment.

Recommended Test Cases

1) Enable APM in the testing environment .
2) Enable csp ReportOnly mode from spl.properties (com.oracle.ouaf.web.cspReporting.enable=true) and disbale csp .
3) Write a UI map where you make call to CSP violated external urls.
4) This should be reported in browser console.
5) Now reload the application in browser.
6) If APM is enabled, you should see the allowlist entry in the "CSP Allow Lists" dashboard on APM .
7) If APM in not enabled (on-prem), you should see this allowlist in browser console .
