The information contained in this document is proprietary and confidential to Oracle and is subject to the non-disclosure obligations described in the license agreement between your company and Oracle. You may not provide this document or any copy of this document to third parties outside your company unless you first obtain the written permission of Oracle.

This document introduces new and changed business and technical features that Oracle has included in the"Single Fix" described in this document.

The functionality of the Single Fix described in this document may be superseded by functionality included in a future Single Fix, Release or Update. Oracle reserves the right to revise or expand the functionality of any future Single Fix, Release or Update of Framework in a manner compatible with Oracle's business objectives, and the business objectives of each of Oracle's customers, at the time that Oracle makes the software code generally commercially available.

Oracle will provide you with additional information concerning product Releases or Updates after Oracle finalizes the related specifications and tests the product component(s). Final documentation will be shipped to you with the media containing the Release or Update.

Please contact Oracle Customer Service Group if you have any questions or comments concerning this document, which has been prepared for your benefit as a licensee of Framework.

Description
Steps To Recreate

Description

Server encountered error when Submitting request for Plugin Driven Data Correction

Steps To Recreate

1. In a QA env, delete all previous batch runs of the F1DTCREQ batch.
2. Create a request type(populate Related Transaction BO as F1-DataCorrectPlugin) and request for data correction. Provide appropriate Update BO/Script as per usecase.
3. Transition to Approved Status then click submit
4. Error is encountered.

Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N

The following questions are only applicable to products built on Oracle Utilities Application Framework version 22A / 4.5.0.0.0 or earlier.

Change Type	Y/N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

FW Changes

Implemented a null check and default the variables in the script.

Recommended Test Cases

1. In a QA env, delete all previous batch runs of the F1DTCREQ batch.
2. Create a request type(populate Related Transaction BO as F1-DataCorrectPlugin) and request for data correction. Provide appropriate Update BO/Script as per usecase.
3. Transition to Approved Status then click submit
4. No error should be encountered, request should go into Submitted status and update the Record as intended.
