Reported Issue

Description

- A Customer Modification(CM) MO Option “Valid BO Option Type” on maintenance Object “F1-SYNCREQIN” was removed in recent MSCS upgrade 25.10 MP 3.3.0.

Steps to Recreate

1. Navigate to F1-SYNCREQIN maintenance object.
2. Observe that the MO option for ‘Valid BO Option Type’ and value of ‘F1OM’ is not present in the MO options list of the F1-SYNCREQIN maintenance object.

Solution Design

Create a hand coded SQL to insert the Inbound Sync Request MO Option row having F1BP/F1OM combination, sequence 1, if row does not exist.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Changes

- **The patch contains manually added INSERT statement to insert the Inbound Sync Request MO Option row having F1BP/F1OM combo, sequence 1, if row does not exist**.

Recommended Test Cases

Test Case: Verify that the MO option for 'Valid BO Option Type' and value of 'F1OM' is present in the MO options list of the F1-SYNCREQIN maintenance object.

1. Navigate to F1-SYNCREQIN maintenance object.
2. Verify that the MO option for 'Valid BO Option Type' with the value of 'F1OM' and owner flag C2M is present in the MO options list of the F1-SYNCREQIN maintenance object.
3. Note that if there is already an existing row on the F1-SYNCREQIN MO for the 'Valid BO Option Type' with 'F1OM' as value with sequence 1, then the patch will not insert any new entry.
