Reported Issue

Description

In SQ Details tab, the 340K SQ (both Initial and Billable) shows a value of 560.219280 in CCB, where the last two decimal digits differ from the CCS results showing 560.219259

In SQ Details tab - 340K SQ, both Initial and Billable, is 560.219280. Last 2 decimal digits are different from CCS result.

Steps to Recreate

1. Create device type of Item Type and select the Calculation Method as blank and enter the device type service quantity as 2.334247 KWH with effective date/time 2010-01-01-00.00.00.
2. Create a service point of Multi-item type. On the SP Multi-Item Information zone, add multi-item with Item Count as 4.
3. Create a Usage Calculation Group and add “Get Item Counts and Consumption” usage rule in it.
4. Create a Usage Subscription and add the above Usage Group.
5. Add the above Service point on the US.
6. Create Usage Transaction from 01-02-2020 12:00AM to 03-02-2020 12:00AM (i.e for 60 days) and observe that the usage period quantity is calculated as 560.219260 KWH.

Usage Period SQ Details

	UOM	TOU	SQI	Start Date/Time	End Date/Time	Usage Type	Quantity	Usage Group / Usage Rule	Service Point
1	Kilo-Watt-Hour			01-02-2020 12:00:00AM PST	03-02-2020 12:00:00AM PST	Frequently Read	560.219260	1_ZZ_DH1_UG1_38605682/GET_ITEM_COUNT	Near Central Park1, La

Usage Period Item Details

	UOM	Start Date/Time	End Date/Time	Usage Type	Item Count	Quantity	Usage Group / Usage Rule	Service Point
1	Kilo-Watt-Hour	01-02-2020 12:00:00AM PST	03-02-2020 12:00:00AM PST	Frequently Read	4.00	560.219260	1_ZZ_DH1_UG1_38605682/GET_ITEM_COUNT	Near Central Park1, Lane1, N

Page 1 of 1 (1 Records)

Solution Design

In script, in step 30- D2-Calc-EDA, when the values of ($qty * $timeInterval) div (24*60*60) are calculated remove the rounding logic for it.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Changes:

Script: D2-Calc-EDA

Recommended Test Cases

Test Case: Verify that the usage period quantity is calculated correctly and the last two decimal values are correct on the Usage Transaction when the usage rule "Get Item Counts and Consumption" is configured.

1. Create device type of Item Type and select the Calculation Method as blank and enter the device type service quantity as 2.334247 KWH with effective date/time 2010-01-01-00.00.00.
2. Create a service point of Multi-item type. On the SP Multi-Item Information zone, add multi-item with Item Count as 4.
3. Create a Usage Calculation Group and add “Get Item Counts and Consumption” usage rule in it.
4. Create a Usage Subscription and add the above Usage Group.
