You may not provide this document or any copy of this document to third parties outside your company unless you first obtain the written permission of Oracle.

This document introduces new and changed business and technical features that Oracle has included in the ”Single Fix” described in this document.

The functionality of the Single Fix described in this document may be superseded by functionality included in a future Single Fix, Release or Update. Oracle reserves the right to revise or expand the functionality of any future Single Fix, Release or Update of Oracle Utilities Service and Measurement Data Foundation in a manner compatible with Oracle’s business objectives, and the business objectives of each of Oracle’s customers, at the time that Oracle makes the software code generally commercially available.

Oracle will provide you with additional information concerning product Releases or Updates after Oracle finalizes the related specifications and tests the product component(s). Final documentation will be shipped to you with the media containing the Release or Update.

Please contact Oracle Customer Service Group if you have any questions or comments concerning this document, which has been prepared for your benefit as a licensee of Oracle Utilities Service and Measurement Data Foundation.

Test Case 3: Create UT for the date break on last day of closing bill for the removed device before the date break date with Interval MC 5

Reported Issues

Description

When a closing bill is generated for Service Agreement (SA) where SA stop date coincides with a rate version break date, the system incorrectly generates a single continuous usage period instead of splitting it.

Steps to Recreate

1. Create a device, device configuration, interval MC.
2. Create a service point and install the device on service point.
3. Create measurements on the interval MC from 01-01-2025 12 AM to 03-02-2025 12:00AM.
4. Create usage calculation group with D2-Math Usage rule.
5. Create usage subscription with above service point and usage calculation group.
6. Move the usage subscription to inactive status and set the end date/time as 03-01-2025 12 AM.
7. Create a usage transaction.
    a. Bill Condition = Closing
    b. Date break = 03-01-2025 12 AM
    c. UT Start date/time = 02-15-2025 12 AM and UT End date/time = 03-02-2025 12 AM.
8. Observe that usage transaction creates only single usage period from 02-15-2025 12 AM - 03-01-2025 12 AM
    a. Usage period from 03-01-2025 12 AM to 03-02-2025 12 AM is missing.

Solution Design

The Enter Algorithm ‘Calculate Usage’ of the Usage Transaction BO is updated to invoke the business service ‘D1-DetSubscriptionDvcCfgPeriod’, which will create a new date-break usage period if the device remains active within the existing period.

Test Case 1: Create UT for the date break on last day of closing bill for an active device with Interval MC

1. Create a device, device configuration, interval MC.
2. Create a service point and install the device on service point.
3. Create measurements on the interval MC from 01-01-2025 12 AM to 03-02-2025 12:00AM.
4. Create usage calculation group with D2-Math Usage rule.
5. Create usage subscription with above service point and usage calculation group.
6. Move the usage subscription to inactive status and set the end date/time as 03-01-2025 12 AM.
7. Create a usage transaction.
    a. Bill Condition = Closing
    b. Date break = 03-01-2025 12 AM
    c. UT Start date/time = 02-15-2025 12 AM and UT End date/time = 03-02-2025 12 AM.
8. Observe that usage transaction creates two usage periods.
    a. First from 02-15-2025 12 AM - 03-01-2025 12 AM
    b. Second from 03-01-2025 12 AM to 03-02-2025 12 AM

Test Case 2: Create UT for the date break on last day of closing bill for the removed device on date break date with Interval MC

1. Create a device, device configuration, interval MC.
2. Create a service point and install the device on service point.
    a. Remove the device on 03-01-2025 10 AM

 Copyright ©2026, Oracle. All rights reserved.

3. Create measurements on the interval MC from 01-01-2025 12 AM to 03-02-2025 12:00AM.
4. Create usage calculation group with D2-Math Usage rule.
5. Create usage subscription with above service point and usage calculation group.
6. Move the usage subscription to inactive status and set the end date/time as 03-01-2025 12 AM.
7. Create a usage transaction.
    a. Bill Condition = Closing
    b. Date break = 03-01-2025 12 AM
    c. UT Start date/time = 02-15-2025 12 AM and UT End date/time = 03-02-2025 12 AM.
8. Observe that usage transaction creates two usage periods.
    a. First from 02-15-2025 12 AM - 03-01-2025 12 AM
    b. Second from 03-01-2025 12 AM to 03-01-2025 10 AM

Test Case 3: Create UT for the date break on last day of closing bill for the removed device before the date break date with Interval MC

1. Create a device, device configuration, interval MC.
2. Create a service point and install the device on service point.
    a. Remove the device on 02-28-2025 10 AM
3. Create measurements on the interval MC from 01-01-2025 12 AM to 03-02-2025 12:00AM.
4. Create usage calculation group with D2-Math Usage rule.
5. Create usage subscription with above service point and usage calculation group.
6. Move the usage subscription to inactive status and set the end date/time as 03-01-2025 12 AM.
7. Create a usage transaction.
    a. Bill Condition = Closing
    b. Date break = 03-01-2025 12 AM
    c. UT Start date/time = 02-15-2025 12 AM and UT End date/time = 03-02-2025 12 AM.
8. Observe that usage transaction creates only one usage period.
