The information contained in this document is proprietary and confidential to Oracle and is subject to the non-disclosure obligations described in the license agreement between your company and Oracle. You may not provide this document or any copy of this document to third parties outside your company unless you first obtain the written permission of Oracle.

This document introduces new and changed business and technical features that Oracle has included in the ”Single Fix” described in this document.

The functionality of the Single Fix described in this document may be superseded by functionality included in a future Single Fix, Release or Update. Oracle reserves the right to revise or expand the functionality of any future Single Fix, Release or Update of Oracle Utilities Service and Measurement Data Foundation in a manner compatible with Oracle’s business objectives, and the business objectives of each of Oracle’s customers, at the time that Oracle makes the software code generally commercially available.

Oracle will provide you with additional information concerning product Releases or Updates after Oracle finalizes the related specifications and tests the product component(s). Final documentation will be shipped to you with the media containing the Release or Update.

Please contact Oracle Customer Service Group if you have any questions or comments concerning this document, which has been prepared for your benefit as a licensee of Oracle Utilities Service and Measurement Data Foundation.

Reported Issue

Description

To Do Entry: D1-MC Characteristic value To Do characteristics zone DO NOT MATCH the MC ID for the "Related Object".

Steps To Recreate

1. Have a setup with a Device, DC and multiple MC's including Interval and Scalar.
2. Create an IMD in an error in the Scalar MC so that a To Do of D1-IMDTD is created
3. Observe the incorrect MC Characteristic Value is populated in the created To Do.

Solution Design

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	Y
Is there an impact on any batch process?	Y
Is there an impact on CM – Custom Modification processing?	Y
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Changes

Java

TransactionalContextCompleter_Impl (Updated): the updated code sets the class member measuringComponent when a value is passed in.

Data Clean-Up / Fixes

Not applicable

Recommended Test Cases

Test Case 1: Interval MC: Verify the correct MC Characteristic Value is populated on D1-IMDTD (IMD Exception) To Do when DC has multiple MC's

1. Have a setup with a Device, DC and multiple MC's including Interval and Scalar.
2. Create an IMD in an error in the Scalar MC so that a To Do of D1-IMDTD is created
3. Verify the correct MC Characteristic Value is populated in the created To Do.

Test Case 2: Scalar MC: Verify the correct MC Characteristic Value is populated on D1-IMDTD (IMD Exception) To Do when DC has multiple MC's

1. Have a setup with a Device, DC and multiple MC's including Interval and Scalar.
2. Create an IMD in an error in the Interval MC so that a To Do of D1-IMDTD is created
3. Verify the correct MC Characteristic Value is populated in the created To Do.
