Reported Issue

Description

The “**Char Value Evaluation Option**” on the Calculation Rule Eligibility Criteria, which was introduced as part of Bug **38128184**, is set as a required field. Having this field as "required" may cause issue during CMA import.

Steps to Recreate

Data Setup

- Create a Characteristic Type.

Characteristic Type

- Create a Calculation Group with 2 Calculation Rules.

Copyright ©2026, Oracle. All rights reserved.

Calculation Group

- Calculation Rule Seq 10 Calc rule 1: Flat Charge.

Calculation Rule

- Seq 20 Calc rule 2: Calculate Service Quantity

- Add Eligibility Criteria (Service Point).

Calculation Rule

- Save the Eligibility Criteria without providing Char Val Eval option value.

Calculation Rule Eligibility Criteria

Reported Issue

- Even though no value is provided it is saved as ‘Both’.

Calculation Rule

- **Expected**: The Char Value Evaluation Option in the calculation rule should set to blank upon saving if no value is set.
- **Actual**: The Char Value Evaluation Option in the calculation rule is set to Both upon saving if value is blank.

Solution Design

- Update the ***ApplyCalcRuleEligibilityCriteriaEvaluateCriteriaFieldAlgComp_Impl*** Calc Rule Eligibility Criteria entity implementation to consider blank lookup value as both..
- The “Char Value Eval Option” element should be made optional in the **Business Object** ***C1-CalcRuleEligibilityCriteria*** i.e., remove ***“required=true”***.
