The information contained in this document is proprietary and confidential to Oracle and is subject to the non-disclosure obligations described in the license agreement between your company and Oracle. You may not provide this document or any copy of this document to third parties outside your company unless you first obtain the written permission of Oracle.

This document introduces new and changed business and technical features that Oracle has included in the"Single Fix" described in this document.

The functionality of the Single Fix described in this document may be superseded by functionality included in a future Single Fix, Release or Update. Oracle reserves the right to revise or expand the functionality of any future Single Fix, Release or Update of Framework in a manner compatible with Oracle's business objectives, and the business objectives of each of Oracle's customers, at the time that Oracle makes the software code generally commercially available.

Oracle will provide you with additional information concerning product Releases or Updates after Oracle finalizes the related specifications and tests the product component(s). Final documentation will be shipped to you with the media containing the Release or Update.

Please contact Oracle Customer Service Group if you have any questions or comments concerning this document, which has been prepared for your benefit as a licensee of Framework.

Reported Issue

Contents

- Description
- Steps To Recreate

Description

When running the Batch Job - F1-TDPG - Purge Completed To Do Entries
When the "TO DO ENTRY" Maintenance Object has MO Audit Algorithms defined on it.
The batch fails with an Error -> "To Do ID 00000002218148 is archived or restricted."

Steps To Recreate

1. Create a MO Audit plug-in script
   It can just have a Dummy Step
   move "parm/hard/action" to $action;
2. Create a associated Algorithm Type/Algorithm based on the Plug-In Script
3. Update the "TO DO ENTRY" Maintenance Object to have the new Algorithm
   Note: Before submitting the Batch Job you may need to restart the ThreadPool Worker
4. Submit the Batch Job - F1-TDPG - Purge Completed To Do Entries
   Targeting some old Completed To Do's by Type

You will receive an error Error -> "To Do ID 00000002218148 is archived or restricted."

Summary
FW Changes

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N

The following questions are only applicable to products built on Oracle Utilities Application Framework version 22A / 4.5.0.0.0 or earlier.

Change Type	Y/N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

FW Changes

Within the framework session MO Audit processing change the way the entity is being retrieved so that it can handle the fact that the entity may be archived.

Recommended Test Cases

See Steps to Reproduce

The error message will no longer be produced, and the To Do Entries will be successfully Archived.
