Reported Issue

Description

The **Retrieve Most Recent Payment** (***C1-RETMRPYMT***) Business Service incorrectly identifies the "latest payment" by excluding payments made on the current day if they were posted after midnight. This results in outdated financial details being presented to the user immediately after a payment is made.

Steps To Recreate

- Find/Create an account with multiple frozen payments on the same day.

Account ID 2456989340

Payment Amount

Payment Event ID

Payment Date	Person Name	Payment Amount	Payment Status	Account ID	Payment ID
01-08-2026	Non CIS Payment	$15.00	Frozen	2456989340	245096486025
01-08-2026	Non CIS Payment	$15.00	Frozen	2456989340	245298105886
01-08-2026	Non CIS Payment	$10.00	Frozen	2456989340	245945199347
01-08-2026	Non CIS Payment	$10.00	Frozen	2456989340	245952823703
06-04-2025	Non CIS Payment	$50.00	Freezable	2456989340	245047693105
06-04-2025	Non CIS Payment	$15.00	Freezable	2456989340	245525895485
05-08-2025	Non CIS Payment	$15.00	Frozen	2456989340	245231503912
05-08-2025	Non CIS Payment	$15.00	Frozen	2456989340	245246109029
05-08-2025	Non CIS Payment	$50.00	Frozen	2456989340	245387174650

Multiple frozen payments exist on 2026-01-08 for account

- Verify that one of the payment FT's Freeze Date/Time should be set exactly in midnight of the same day.

Copyright ©2026, Oracle. All rights reserved.

Take note of the Payment ID (Parent ID) on FT. Freeze Date/Time is set to midnight.

- On the **Override User System Date** Zone, Set the Override Date to match the Payment Date

- Test the **Retrieve Most Recent Payment** (***C1-RETMRPYMT***) Business Service using the **Financial Details Service** (***C1FinDetails***) Service Script with the Account ID and "HTTP Method" set to **Get**.

Expected Result: The latest payment as of the provided Current Date value is shown.

Actual Result: The payment posted exactly at midnight of the day is shown, even though there are later payments made within the day.

Copyright ©2026, Oracle. All rights reserved.

Payment post exactly at midnight of the day is shown

Solution Design

Update the SQL query in the **Retrieve Most Recent Payment** (***C1-RETMRPYMT***) Business Service to apply the **TRUNC** function to the payment freeze date-time column. This truncates the value to a date-only format (midnight) before comparison, ensuring it matches the granularity of the input date and correctly includes same-day payments.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	Y
Is there an impact on any batch process?	N

Copyright ©2026, Oracle. All rights reserved.

Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Other Changes

Zone

Retrieve Most Recent Payment (C1-RETMRPYMT) (Existing)

Update the SQL query to apply the **TRUNC** function to the payment freeze date-time column.

SQL Changes

SQL Before Change

```
SELECT q.*
FROM
(
   SELECT  A.PAY_EVENT_ID
       , A.PAY_DT
       , B.PAY_ID
       , B.PAY_AMT
   FROM CI_PAY_EVENT A,CI_FT FT, CI_PAY B
   WHERE A.PAY_EVENT_ID = B.PAY_EVENT_ID
          AND B.CAN_RSN_CD = ' '
          AND B.ACCT_ID = :F1
          AND B.PAY_STATUS_FLG = '50'
          AND FT.FT_TYPE_FLG='PS'
          AND FT.PARENT_ID=B.PAY_ID
          AND FT.FREEZE_DTTM <= :F2
   ORDER BY FT.FREEZE_DTTM DESC
) q
where ROWNUM=1

Data Clean-Up / Fixes

Not Applicable

Recommended Test Cases

Test Case 1: Reported Issue

- See Steps To Recreate
- On the **Override User System Date** Zone, Set the Override Date to match the Payment Date
- Test the **Retrieve Most Recent Payment** (***C1-RETMRPYMT***) Business Service using the **Financial Details Service** (***C1FinDetails***) Service Script with the Account ID and "HTTP Method" set to **Get**.

Expected Result: The latest payment as of the provided Current Date value is shown.

Copyright ©2026, Oracle. All rights reserved.

Test Case 2: Regression – Current Date is later than Payment Date

- See Steps To Recreate
- On the **Override User System Date** Zone, Set the Override Date later than the Payment Date
- Test the **Retrieve Most Recent Payment** (***C1-RETMRPYMT***) Business Service using the **Financial Details Service** (***C1FinDetails***) Service Script with the Account ID and "HTTP Method" set to **Get**.

Expected Result: The latest payment as of the provided Current Date value is shown. If there are no later payments made after the target payment date, the latest payment from the target payment date will be shown.

Test Case 3: Regression – Current Date is earlier than Payment Date

- See Steps To Recreate
- On the **Override User System Date** Zone, Set the Override Date earlier than the target Payment Date.
- Test the **Retrieve Most Recent Payment** (***C1-RETMRPYMT***) Business Service using the **Financial Details Service** (***C1FinDetails***) Service Script with the Account ID and "HTTP Method" set to **Get**.

Expected Result: The latest payment as of the provided Current Date value is shown. Payments from the target Payment Date are not shown as they occur later than the provided Current Date.
