Reported Issue

Description

During the Payment Arrangement (PA) Request process flow, the Number of Installments field ***PA_RQST_NBR_INSTALLMENT*** currently restricts user input to a maximum of 3 digits. As a result, it is not possible to create a Payment Arrangement with more than 999 installments.

Steps To Recreate

- Navigate to Account with current balance greater than 10000.

Account

- Add Payment Arrangement Request and populate Account id and select Payment Arrangement Request Type.

Payment Arrangement Request Type

- In the 2nd panel, enter the number of installments, installment amount and ensure that number of installments is greater than 3 digits.

Copyright ©2026, Oracle. All rights reserved.

Payment Arrangement Request Type

- Click on next.
- Click on finish. An error message is displayed on the screen.

Payment Arrangement Request - Error encountered

Expected Result: Payment Arrangement Request process flow should complete successfully when installment value is set to value more than 3 digits.

Actual Result: Payment Arrangement Request process flow throws an error "**Value (%1) for field %2 is too large. The maximum precision is %3.”** when the number of installments exceeds three.

Solution Design

- Update the **Number of Installments** field to increase its field precision from 3 to 5.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	**Y**
Is there an impact on any user interface or any other on-line behavior?	**Y**
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Table Changes

C1_PA_RQST (Payment Arrangement Request)

- Modify the **Number of Installments** column to support 5 digits.

Field	Format
PA_RQST_NBR_INSTALLMENT (Number of Installments)	~~N(3)~~ N(5)

Other Changes

Field

PA_RQST_NBR_INSTALLMENT – (Number of Installments) (Existing)

Main

Field	Value
Field Name	PA_RQST_NBR_INSTALLMENT
Data Type	Number
Field Precision	~~3~~ 5
Field Scale	0
Signed	No

Value List	
Description	Number of Installments
Java Field Name	paRequestNumberOfInstallments
Work Field	No

Data Clean-Up / Fixes

N/A.

Recommended Test Cases

Test Case 1: Metadata Verification

- Verify the PA_RQST_NBR_INSTALLMENT Field if it has the Field Precision as 5.

Test Case 2: Database Verification

- Verify in the database if the Precision for the PA_RQST_NBR_INSTALLMENT Field is updated to 5.

Test Case 3: Verify that the Payment Arrangement process flow completes successfully when the number of installments value is set to a 5-digit value

- Refer Steps to Recreate.
- **Expected Results:** Verify that no error is displayed and that the process flow completes successfully when the installment value is set to a 5-digit value.
