Description
Steps To Recreate

Description

Health assessment calculation returns 0 as the "Percentage to Failure" value when the assessment result is Fail.

This incorrect value occurs in the following scenario:

The Measured Value is greater than or equal to the Fail Limit, and
The Assessment Score is not set by the algorithm that calculates the Measured Value.

Steps To Recreate

Select or create a Health Assessment Type where the Health Assessment Type algorithm calculates a Measured Value that is greater than or equal to the Fail Limit. Also, ensure the algorithm does not set the Assessment Score.

Run the Health Assessment Monitor batch (F1ASMNT).

After the batch completes, review the latest health assessment for that Health Assessment Type.

Expected: Percentage to Failure should be 100.
Actual: Percentage to Failure is 0.

Summary
FW Changes

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N

The following questions are only applicable to products built on Oracle Utilities Application Framework version 22A / 4.5.0.0.0 or earlier.

Change Type	Y/N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

FW Changes

Changes have been made to calculate the Assessment Score (if it is not already available) before calculating Percentage to Failure, so that the application has the correct Assessment Score value when Percentage to Failure is computed.

Recommended Test Cases

Same as "Steps to Recreate".
