Description
Steps To Recreate

Description

When CM ILM Eligibility algorithm is plugged-in to MO, ILM Configuration master configuration's ILM Managed Maintenance Objects display duplicate MO rows

Steps To Recreate

Steps to recreate

Create a Custom Eligibility Algorithm
Add Custom Eligibility Algorithm to MO which is in ILM Master configuration

Before Fix- Master Configuration: ILM Configuration displays the multiple duplicate algorithms.

After the fix - Master Configuration: ILM Configuration displays the Eligibility algorithm which is active and with highest sequence Number.

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N

The following questions are only applicable to products built on Oracle Utilities Application Framework version 22A / 4.5.0.0.0 or earlier.

Change Type	Y/N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

FW Changes

Added a condition to exclude inactive algorithms and ensure that only the algorithm with the highest active sequence is considered. This change resolves the duplicate algorithm display issue in ILM Master Configuration.

Recommended Test Cases

Steps to recreate

Create a Custom Eligibility Algorithm
Add Custom Eligibility Algorithm to MO which is in ILM Master configuration

Before Fix- Master Configuration: ILM Configuration displays the multiple duplicate algorithms.

After the fix - Master Configuration: ILM Configuration displays the Eligibility algorithm which is active and with highest sequence Number.
