Reported Issue

Description

For commercial program, the Settlement Transaction created "after Event" will be moved to CALC-DEFER status (since the amount calculation will be deferred). Once a Settlement is moved to calculation deferred status, there are cases where meter reads can be corrected and there is no way to RECALCULATE these transactions since CALC-DEFER is defined as FINAL status.

Steps to Recreate

1. Create Program Settlement Calculation Group with End of Event program settlement rule.
    a. Defer Amount Calculation = Yes
    b. UOM = KW
2. Create Program / Program event.
    a. Configure Program Settlement Calculation Group
3. Create Program Subscription.
    a. Configure Program
4. Create an EST. It is transitioned to “Calculation Deferred” state
5. Observe that there is no way to RECALCULATE EST since CALC-DEFER is defined as FINAL status.

Solution Design

1. Script: X1-CalcEST
    1. Removed step 20
       if ("string(bo_schema/deferCalculation) = 'D2YS'")
         terminate;
       end-if;
2. Updated "CAL-DEFER" life cycle state of the BO: X1-EventSettlementTransaction
    1. Added Next Status "CALCULATE"
    2. Added Monitor Process: Recalculate Event Settlement
    3. Added 3 enter algorithms.
3. Updated the Pre-Processing script: X1ESTCD of Event Settlement Transaction BO to calculate Average drop and min drop for End of Season EST's

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Recommended Test Cases

Test Case 1: Create End of Event EST

1. Create Program Settlement Calculation Group with End of Event program settlement rule.
    a. Defer Amount Calculation = Yes
    b. UOM = KW
2. Create Program / Program event.
    a. Configure Program Settlement Calculation Group
3. Create Program Subscription.
    a. Configure Program
4. Create an End of Event EST. It is transitioned to “Calculation Deferred” state.
5. Verify that User can now click on Calculate button to Recalculate the EST.

Test Case 2: Create End of Season EST

1. Create Program Settlement Calculation Group with End of Season program settlement rule.
    a. UOM = KW
2. Create Program / Program event.
    a. Configure Program Settlement Calculation Group
3. Create Program Subscription.
    a. Configure Program

Copyright ©2026, Oracle. All rights reserved.

4. Create an End of Season EST. It is transitioned to “Calculation Deferred” state.
    a. This will also calculate Average, Min and Max drop,
5. If the User intends to change the service quantities, click will click edit, update the quantities and click save. The Average, Min and Max drop will be rederived based on the service quantities.
