The information contained in this document is proprietary and confidential to Oracle and is subject to the non-disclosure obligations described in the license agreement between your company and Oracle. You may not provide this document or any copy of this document to third parties outside your company unless you first obtain the written permission of Oracle.

This document introduces new and changed business and technical features that Oracle has included in the"Single Fix" described in this document.

The functionality of the Single Fix described in this document may be superseded by functionality included in a future Single Fix, Release or Update. Oracle reserves the right to revise or expand the functionality of any future Single Fix, Release or Update of Framework in a manner compatible with Oracle's business objectives, and the business objectives of each of Oracle's customers, at the time that Oracle makes the software code generally commercially available.

Oracle will provide you with additional information concerning product Releases or Updates after Oracle finalizes the related specifications and tests the product component(s). Final documentation will be shipped to you with the media containing the Release or Update.

Please contact Oracle Customer Service Group if you have any questions or comments concerning this document, which has been prepared for your benefit as a licensee of Framework.

Description
Steps To Recreate

Description

There is a mismatch with fields describing the formatInstructions to get summary of a doctype with AIA in the schema of data area: F1-AIGenericSummarizationParm

```
 <formatInstructions type="group" mapXML="XML_SOURCE">
       <length mdField="F1_SUMM_LEN_FLG" dataType="lookup"
lookup="F1_SUMM_LEN_FLG"/>
       <format mdField="F1_SUMM_FRMT_FLG" dataType="lookup"
lookup="F1_SUMM_FRMT_FLG"/>
    </formatInstructions>
```

The AIA rest endpoint used to summarize doctype expects this in the following format in JSON:

```
"format_instructions": {
   "length": "short",
  "summary_format": "bullet"
  }
```

Steps To Recreate

Make a service call to summarize a docType with AIA rest endpoint. The summary result of the request is coming with the default length and format configured at the time of docType registration with AIA config. Specifying the values to the field length and format within formatInstructions has no effect on summary result. These values are populated from the values configured in the extend able lookup (F1-AISummarizationType) for the docType.

Summary
FW Changes

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N

The following questions are only applicable to products built on Oracle Utilities Application Framework version 22A / 4.5.0.0.0 or earlier.

Change Type	Y/N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

FW Changes

Updated schema of F1-AIGenericSummarizationParm data area

Recommended Test Cases

Make a service call to summarize a docType with AIA rest endpoint.
Observe the summary result as part of the response.
The length and format of the summary should be obtained as specified in the configured extended able lookup (F1-AISummarizationType) for the docType.
