Reported Issue

Description

When the Letter Print Extract batch is interrupted and restarted, processing neither resumes from the last processed point nor restarts for all records, resulting in missing letters

Steps To Recreate

- Go to Main Menu > Tools > Batch Job Submission > Add

Main Menu – Add Batch Job Submission

- Search for **Letter Print Extract** (***C1-LTPEX***)

Batch Job Submission

Copyright ©2026, Oracle. All rights reserved.

- Populate the following parameters:
  - Thread Count: 2
  - File Format: FIXD
  - File Extension: txt
  - Concatenate Files: false
  - Continue After Error: true

Batch Job Submission – Main

Batch Job Parameters

Parameter Name	Description	Parameter Value
filePath	▶ File Path	
fileFormat	▶ File Format	FIXD
fileExtension	▶ File Extension	txt
concatFiles	▶ Concatenate Files	false
xmlRootName	▶ XML Root Name	
csvDelim	▶ CSV File Delimiter	
charEncoding	▶ Character Encoding	
DIST-THD-POOL	▶ Thread Pool Name	
maxErrors	▶ Override maximum errors	
overrideLowIdValue	▶ Override Low Identifier	
overrideHighIdValue	▶ Override High Identifier	
idRangeOverrideClass	▶ Identifier Range Override Class	
continueAfterError	▶ Continue After Error	true

Batch Job Submission – Batch Job Parameters

- Click Save
- Batch run is now In Progress status

Main

Batch Job	Letter Print Extract, Started
Batch Control	Letter Print Extract
Batch Job Status	Started
Batch Run	162, In Progress, processed records (9), in error (0).
Batch User	
Language	English
Email Address	
Desired Execution Date/Time	01-23-2026 02:13AM
Thread Count	2
Thread Nbr	0

Batch Job Submission – Main

Copyright ©2026, Oracle. All rights reserved.

- Go to Batch Run, select Threads tab

Batch Job Submission – Main

- Allow the first thread (the thread to be interrupted) to start processing records and reach a partially processed state before completion

Thread	Start Date/Time	End Date/Time	Status	Messages	Processed
1	01-23-2026 02:53AM		In Progress		0
2	01-23-2026 02:52AM		In Progress		0

Batch Run Threads

Thread	Start Date/Time	End Date/Time	Status	Messages	Processed	I
1	01-23-2026 02:53AM		In Progress		10	0
2	01-23-2026 02:52AM		In Progress		36	0

Batch Run Threads

- While the second thread is In Progress, manually interrupt or terminate that specific thread

Thread	Start Date/Time	End Date/Time	Status	Messages	Processed
1	01-23-2026 02:53AM	01-23-2026 02:53AM	Interrupted	2	21
2	01-23-2026 02:52AM	01-23-2026 02:53AM	Complete		107

Batch Run Threads – Interrupted

- Notice that the interrupted batch job is automatically restarted

Thread	Start Date/Time	End Date/Time	Status	Messages	Processed
1	01-23-2026 02:53AM	01-23-2026 02:53AM	In Progress	2	21
1	01-23-2026 02:54AM		In Progress		6
2	01-23-2026 02:52AM	01-23-2026 02:53AM	Complete		107

Batch Run Threads – Restarted

Copyright ©2026, Oracle. All rights reserved.

Thread	Start Date/Time	End Date/Time	Status	Messages	Processed
1	01-23-2026 02:53AM	01-23-2026 02:53AM	Complete	2	21
1	01-23-2026 02:54AM	01-23-2026 02:54AM	Complete		57
2	01-23-2026 02:52AM	01-23-2026 02:53AM	Complete		107

Batch Run Threads – Complete

- **Expected Result:** Restarted thread is successfully completed and processed all records
- **Actual Result:** Restarted thread is successfully completed with incomplete processed records

Solution Design

- Update Letter Print Extract Thread Iteration Worker to implement Single Transaction Worker interface, consistent with the framework-provided Plugin Driven Extract Thread Iteration Worker. This is to enforce controlled extract processing to avoid partial or overridden extract output and ensure consistent restart behavior

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	**Y**
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Background Processes

LetterPrintExtractThreadIterationWorker.java – Letter Print Extract Thread Iteration Worker

Business Rules

- Implement Single Transaction Worker
  - Add required methods
    - Set Last Work Unit, this is invoked prior to processing the final work unit of a thread to indicate end-of-processing state
    - Is Last Work Unit, this indicates whether the current work unit is the final work unit of the thread

Data Clean-Up / Fixes

N/A

Recommended Test Cases

Test Case 1: Reported Issue

- Go to Main Menu > Tools > Batch Job Submission > Add
- Search for **Letter Print Extract** (***C1-LTPEX***)
- Populate the following parameters:
  - Thread Count: 2
  - File Format: FIXD
  - File Extension: txt
  - Concatenate Files: false
  - Continue After Error: true
- Click Save
- Batch run is now In Progress status

Copyright ©2026, Oracle. All rights reserved.

- Go to Batch Run, select Threads tab
- Allow the first thread (the thread to be interrupted) to start processing records state
- While the second thread is In Progress, manually interrupt or terminate that specific thread
- Notice that the interrupted batch job is automatically restarted
- **Expected Result:** Restarted thread is successfully completed and processed all records
