The information contained in this document is proprietary and confidential to Oracle and is subject to the non-disclosure obligations described in the license agreement between your company and Oracle. You may not provide this document or any copy of this document to third parties outside your company unless you first obtain the written permission of Oracle.

This document introduces new and changed business and technical features that Oracle has included in the ”Single Fix” described in this document.

The functionality of the Single Fix described in this document may be superseded by functionality included in a future Single Fix, Release or Update. Oracle reserves the right to revise or expand the functionality of any future Single Fix, Release or Update of Oracle Utilities Meter Data Management in a manner compatible with Oracle’s business objectives, and the business objectives of each of Oracle’s customers, at the time that Oracle makes the software code generally commercially available.

Oracle will provide you with additional information concerning product Releases or Updates after Oracle finalizes the related specifications and tests the product component(s). Final documentation will be shipped to you with the media containing the Release or Update.

Please contact Oracle Customer Service Group if you have any questions or comments concerning this document, which has been prepared for your benefit as a licensee of Oracle Utilities Meter Data Management.

Reported Issue

Description

To-dos from the architect's review:

- Validate Template SQL in the plug-in spot that parses the SQL - ensure that the first word is 'SELECT'
- Remove the Required element on the Device Category
- Parsing Algorithm
    - Add logic to add single quotes on bind value depending on whether numeric or char
- Service Script drop down, return s/s only with description with 'Entity Group Criteria Source%'

1. Update algorithm type detailed description in D1 for D1BLDEGQRY
2. Incorrect Label on Entity Group UI map Main Section, add embedded help.
3. Entity Group Detailed Description on UI map
4. Default the category in Device Population and Control Group BO schema
5. Group Deactivation Option (ENTITY_GRP_DEACT_OPT_FLG) Field Embedded Help
6. Group Assignment Option (ENTITY_GRP_ASSGN_OPT_FLG) Embedded Help
8. Entity Group Category (ENTITY_GRP_CATEGORY) Field Embedded Help

Steps To Recreate

N/A

Solution Design

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N

Copyright ©2025, Oracle. All rights reserved.

Is there an impact on any user interface or any other on-line behavior?	Y
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Data Clean-Up / Fixes

Not applicable

Recommended Test Cases

Test Case 1: Verify algorithm type detailed description D1BLDEGQRY

1. Navigate to Algorithm Type ➔ D1BLDEGQRY
2. Verify algorithm type detailed description.

Test Case 2: Verify Entity Group Main section label

1. Navigate to Entity group ➔ search for any Entity group.
    - Verify the Main section label (earlier it was Entity group instead of Main).

Test Case 3: Verify Entity Group Detailed description

1. Navigate to Entity group ➔ search for any Entity group
    - Verify the Detailed description (earlier it was Text box instead of Text Area).

Copyright ©2025, Oracle. All rights reserved.

Test Case 4: Default the category in Device Population and Control Group and should be open to modify

1. Navigate to Entity group ➔ search for any Entity group
    - Verify the Group Category

Test Case 5: Removed the Required element on the Entity Group Category Extendable lookup

1. Navigate to Extendable Lookup ➔ search for D1-EntityGrpCodeCategoryLookup
2. Broadcast any Extendable Lookup value and verify “Is Required” does not exists anymore under “Criteria Sources” section.

Test Case 6: Validate Template SQL on Entity Group Category

1. Navigate to Entity Group Category Extendable Lookup ➔ search for D1-EntityGrpCodeCategoryLookup
2. Make sure the Template SQL does not start with “select” clause.
3. Search for the Entity Group with the above Entity Group Category
4. Validation error is thrown “Template SQL must start with select clause”.
