Reported Issue

Description

Bug 38805166 - WACS Location Search performance issue.

Steps to Recreate

1. Navigate to Asset Location search.
2. Provide a value at description and search.

Expected Result

No Performance issue should be observed.

Actual Result

Performance issue is observed.

Copyright ©2026, Oracle. All rights reserved.

Investigation

Problem Cause

At zone W1-ASLOQ1, provided a description value in the search, it searches for both description and detailed description columns in the node table.
Detailed description column does not have a index and it results in performance issue.

Suggested Solution

1. Introduce new filter(F20) for detailed description. This makes separate filters for description and detailed description.
2. Add validation that we cannot search only with detailed description.
3. To make the detailed description search case insensitive, Add a new database column DESCRLONG_UPR and provide an upgrade script to populate that column by doing a function upper (DESCRLONG).
.

Solution Design

Summary

Change Type	Y/N
Does this fix require any Admin (Soft) Table Changes to be made by the client?	N
Does this fix require upgrade data changes to be applied?	N
Does the fix involve DB Changes?	N
Is there an impact on any user interface or any other on-line behavior?	N
Is there an impact on any batch process?	N
Is there an impact on CM – Custom Modification processing?	N
Does this fix require an application viewer update for Algorithm data (run F1-AVALG)?	N
Does this fix require an application viewer update for MO data (run F1-AVMO)?	N
Does this fix require an application viewer update for Table data (run F1-AVTBL)?	N

Detailed Changes

Zone

- W1-ASLOQ1 (**update**)- Updated all SQL's to have a separate filter for description and detailed description.
- Add Filter (F20) for detailed description.

Scripts

- W1-ValALocFt **(update):** Updated the Error Message Number.

Message

- 11508 - 14768 **(New):** At least one criteria other than Owning Organization and Detailed Description must be specified.

Field

- DESCRLONG_UPR **(New):** Added new field for detailed description.

UI Map

W1-AssetLocQ1QryFltr **(update):** Added detailedDescription element at schema and html.

Java

Node_CHandler.java **(update):** Added logic to create a upper case value of long description in long description upper field.

Recommended Test Cases

Verify Asset Location search with description/detailed description.

1. Navigate to Asset Location Search.

2. Provide only detailed description value and search.

3. Error “At least one criteria other than Owning Organization and Detailed Description must be specified.” Is observed.

4. provide any other filter value, no error or performance issue should be observed.

5. Search only by providing description filter value, no performance issue is observed.

.

Resolution Verification

- All the above test cases are running successfully.
